Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- A. **Claims 1-4 and 12-13**, drawn to an apparatus and method for providing a service over a communication means to a person in exchange for receiving from said person guaranteed compensation for this service, classified in class 705, subclass 26.
- B. **Claims 5-11**, drawn to an apparatus for issuing a ticket to a person obtaining a service, said apparatus comprising a person sensing and recognizing means, and means for encrypting/decrypting a financial information, wherein said ticket is for certifying receipt of said service, classified in class 235, subclass 383.

Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention B has utility separate from that of inventions A such as presenting a receipt for purchased goods at automated point-of-sale terminal. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, or patentability requirements, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
